Self-adaptive
Debugging-free

Designed specifically for the amplification needs of regular classrooms, it consists of an RM80 invisible amplification microphone and a set of digital powered speakers, making installation and deployment simple. The microphone incorporates audio processing algorithms, eliminating the need for additional audio processing equipment, to deliver clear and natural sound quality evenly distributed throughout the classroom. Teachers do not need to carry or adjust any sound pickup devices, allowing them to focus on teaching. Students can easily hear the lecture clearly from any position in the classroom, facilitating learning.

FEATURES

▼ CONTACTLESS USE, FREE YOUR HANDS

No need to hold or wear sound pickup equipment, and no need to charge and maintain. Equipped with an infrared remote control, one-click controls the switch and adjusts the volume, freeing your hands and using it more contactless.

▼ LONG-DISTANCE SOUND PICKUP, FREE MOVEMENT

The microphone has seven built-in digital microphone arrays, which can achieve effective sound pickup in an 8-meter radius towards its directional area (3 meters or optimal sound pickup), automatically shielding noise interference outside the area.

▼ CLEAR SOUND PICKUP AND COMFORTABLE LISTENING EXPERIENCE

Built-in audio processor, equipped with environment adaptive algorithm, howling suppression, automatic gain algorithm, etc. Automatically eliminate noise and dereverberation, 18ms ultra-low latency, and more comfortable listening.

▼ VOICE FENCE ALGORITHM, ISOLATE NOISE INTERFERENCE

Developed a noise barrier system to isolate interference. Microphones are capable of forming virtual walls at pre-set boundaries of the designated sound pick-up area, capturing sounds within the wall while blocking out external interference. The suppression of external interference exceeds 30dB, with an effective working distance of 2m (optimal performance typically within 1m).

▼ HEALTHY SOUND AMPLIFICATION, BETTER THAN THE NATIONAL STANDARD

Paired with digital active speakers, the amplification volume is 6dB higher than the national amplification standard (increased by 8dB). Complying with the national healthy acoustic environment standards, it can provide clear and balanced sound amplification anywhere in the classroom.

▼ SIMPLE DEPLOYMENT AND EASY MAINTENANCE

The microphone wiring is simple, powered by a USB cable, used by connecting the 3.5mm audio cable to the speaker. No complex wiring installation, and no debugging is needed, which saves labor costs.
